EDUCATION

Turin Polytechnic University in Tashkent

Expected Grad: June 2029

Bachelor of Science in Software Engineering

Tashkent, Uzbekistan

- **Core CS Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Databases, Operating Systems, Computer Networks, Software Architecture, Machine Learning & AI.
- **Engineering Foundations:** Fundamentals of Computer Architecture, Basics of Cybersecurity, Advanced Mathematics, Technical Drawing.

WORK EXPERIENCE

IT Academy (Sponsored by IT Park Uzbekistan)

Sep 2024 – Jan 2025

Backend Developer

Tashkent, Uzbekistan

- Developed a high-performance Telegram bot service using **Nest.js** and **TypeScript** to automate user workflows.
- Built backend microservices and RESTful APIs for an internal **LMS Platform** using **Node.js** and **React**.
- Designed relational database schemas and managed data queries using cloud-hosted **PostgreSQL**.
- Collaborated via **Git/GitHub** for version control, code reviews, and team development workflows.

PROJECTS

Full-Stack Social Network Platform

Next.js, FastAPI, TypeScript, Tailwind CSS, Docker, CI/CD

- Developed a responsive full-stack social web application featuring real-time state management and user authentication.
- Built high-performance REST APIs using **FastAPI** on the backend, optimizing database query responses for fast data retrieval.
- Containerized application environments using **Docker** and set up **CI (Continuous Integration)** automated deployment workflows.
- Designed modular UI components with **Next.js**, **TypeScript**, and **Tailwind CSS** for seamless navigation.

Real-Time Trading Simulation Platform ("Binomo")

React, Vite.js, Node.js, JavaScript, REST APIs

- Architected an interactive trading web app using **React** and **Vite.js**, integrating **TradingView** charts for real-time asset visualization.
- Integrated **Binance API** to fetch live market prices, order book updates, and real-time cryptocurrency data.
- Implemented backend microservices in **Node.js** to manage real-time user balances and trade execution logic.

TECHNICAL SKILLS

Languages: Python (Primary for Problem Solving), JavaScript, TypeScript, SQL, HTML/CSS

Backend Development: Node.js, Nest.js, FastAPI, RESTful APIs, PostgreSQL, SQL

Frontend Development: React, Next.js, Tailwind CSS, Vite.js

Tools & DevOps: Docker, CI/CD, Git, GitHub

COMPETITIVE PROGRAMMING & ACTIVITIES

- **Algorithmic Problem Solving:** Actively practicing algorithmic problem solving on LeetCode with a focus on core Data Structures and Algorithms.
- **Data Automation & Engineering Coursework:** Completed an intensive 2-week technical practice program on automated data processing and workflow optimization.
